Color and cut out the puppets. Option 1: Carefully cut out the holes. Put two fingers through the holes. Your fingers become the puppet's legs. Option 2: Tape the pictures to popsicle sticks, tongue depressors, unsharpened pencils, or rulers to make stick puppets.

Classroom Reproducible: Dealing with Feelings

Life Cycle of a Louse

Nit or Egg

A female louse lays about 5 nits a day.

Nymph

The nit hatches and become a nymph. Nymphs grow and shed their skin 3 times. About 7 days after hatching, a nymph becomes an adult louse.

Adult Louse

An adult louse is the size of a sesame seed. It lives for about 16 days.

● =actual size of an adult louse
