

DRY SAND, DRY SOIL

 Look closely at the sand and the soil. What do you see? Squeeze a handful of sand and a handful of soil.

 What does the sand feel like? Does it stick together? How about the soil?

 Write your name or draw a picture in the sand and in the dirt. What do you notice?

 Make a hill out of the sand. Make a hill out of the soil. Then make a hole in each hill. How are the sand and soil different?
