

# Cyberchase

## Dot Decoder

What's Matt saying to Hacker? Break this code to find out. Each black dot on the picture stands for a letter. The letters spell out Matt's message! How does it work? Read the next page to find out.

Decoder strips

The Secret Message

-----  
|  
-----  
-----

## What To Do

1. Cut out the decoder strips along the dotted lines.
2. Lay one strip flat across the top edge of the picture.
3. Make sure the sides of the decoder line up with the sides of the picture.
4. Slowly move the decoder down the page.
5. When a dot lines up just above a letter on the decoder, write the letter in the space provided below the picture. Then read the message!

Answer at the bottom of the page.

## Wait, There's More!

You can send a secret message to a friend! Cut any picture so that it's the same width as your decoder. Move the decoder down the page and add dots to the picture to spell out your message. Give a decoder strip to a friend. Can your friend read it? For fun pictures to use, check out the Cyber Art section of the Cyberchase Club at [pbskids.org/cyberchase](http://pbskids.org/cyberchase).

Hold this page up to a mirror to see the answer!  
Game over Hacker! You'll never win.
