Name: _____

Date: _____

Boxed In

Go for It!

Good news! Dr. Marbles found two computer parts that will help Motherboard recover some power. Now he needs two boxes to protect the parts while he brings them to her. Which one of these flat cardboard shapes can he fold to make cube-shaped boxes?

First, look at the nets and predict which one will fold into a cube. Then, cut out that net and fold it, along the dotted lines. Did your net make a cube? If not, try again!
