

Cyberchase

pbskids.org/cyberchase

Find the Fractions!

Help! Hacker's at it again! He sent a virus to Motherboard, and now Digit can't find the fractions he needs to fix it. He has a recipe for the antidote, but the ingredients have him stumped. Can you help him? Color in how much of each cyberchip Digit needs.

HINT: You can slice the chips differently to show the fractions Digit needs. Draw lines to show how to slice them.

Tune in to the all-new episodes of Cyberchase beginning March 31st on PBSKids!

Answer: Green chip: slice the quarters in half to get 8ths and color three pieces. White chip: since 2/6 is the same as 1/3, color two pieces. Yellow chip: 4/8 is the same as 1/2 so color the top or bottom half.
