

Sorting–Measuring

This is what you will see when you open the Sorting–Measuring file on the SMART® Board:

You can:

- Use the illustrations to show the correct way to measure objects using non-standard units (such as pennies or erasers) by lining them up together without gaps or overlaps.
- Use the illustrations to demonstrate the meanings of the words “gap” and “overlap.”
- Sort (or invite students to sort) the illustrations into the column that indicates whether the objects were measured correctly, with gaps, or with overlaps.

This is an example of what you will see after correctly sorting the illustrations:
