You can:

- Demonstrate counting by twos beginning with any number.
- Touch any even number and the gray square around that number will turn green, indicating that it is a multiple of 2. (When you touch any odd number you'll hear a short error sound, and the background color will remain gray.)
- Point out the pattern created when counting by twos (all numbers end in 0, 2, 4, 6, or 8).
- Remove the highlighting of a number by touching that number again.
- Reset the chart by advancing to the next page, then going back to the first page.

This is what you will see after touching all numbers that are a multiple of 2:
