

Sorting–Fractions

This is what you will see when you open the Sorting–Fractions file on the SMART® Board:

You can:

- Have children sort shapes divided into parts to build their understanding that halves and fourths/quarters need to be same-size pieces of a whole.
- Move shapes into the correct columns based on how many pieces they are divided into and whether they are divided into same-size pieces.
- Reset the page by touching the Reset Page icon on the toolbar.

This is an example of what you will see when all the shapes have been sorted into the correct columns.

 halves	 fourths or quarters	other
